

DATA VISUALIZATION OF WORLD BANK CLIMATE CHANGE DATA

The Mini-batch clustering of Mortality Rate in all regions in 1990 and 2019. Most scatters fall within the first circle radius.

An area fill plot between the actual, lower and upper limit of the infant mortality rate of Germany. The upper and lower limit are as a result of the losses obtained from curve fitting

The Infant mortality Rate depicts a decreasing trend. The fitted curve shows that the trend follows a nearly negative linear regression
